LEAP LEGAL SOFTWARE

Dear Sir / Madam

FUTURE COMPUTERS

Future Computers have provided all of my IT solutions and equipment including hardware, software, installations, upgrades, and service from the inception of my firm in 2006. I have also used Leap Legal Software since this time.

Future Computers have seen my business grow and have provided valuable assistance in providing the best product knowledge, quality equipment and support to best accommodate my firm's needs.

They also provide my firm with valuable working knowledge of all aspects of Leap Legal Software and take care of all our Leap upgrades when necessary.

The staff at Future is exceptional. They are always helpful to my staff, whether it be a minor question over the telephone, or a major IT breakdown. Future Computers always has my IT solutions so my office can run as smoothly as possible.

I have no hesitation in recommending Future Computers to anyone looking for an IT company and especially if they are running Leap Legal Software.

Yours faithfully

**Christopher Taylor || Principal
