To Whom It May Concern

RE: JOYER CONSULTING

We are a small but successful law firm with offices located in Port Macquarie and Laurieton.

We have retained the services of Joyer Consulting for the past five years for all our computer and information technology needs.

Our offices are linked by remote server and, in order that our offices can continue to operate smoothly and efficiently, it is important for our company to stay up to date with the rapid changes in information technology. Joyer Consulting has been instrumental in assisting us in this regard.

We use LEAP Legal software and have found Joyer to have extensive experience and knowledge with respect to issues which can arise between the LEAP software and its compatibility with various other software programmes.

We have found the staff at Joyer to be extremely friendly, knowledgeable and readily accessible whenever we have had problems with our computers and associated hardware and software programmes. They remotely monitor our computer system at all times and potential problems are dealt with before they can become problems.

We have no hesitation in recommending Joyer Consulting to any business, large or small, as highly capable and friendly IT support.

Yours faithfully

To Whom It May Concern

In 2009, we changed our computer hardware and software systems, and chose Joyer Consulting to effect these changes for us. They provided all of our new hardware and were of great assistance in our transition from Perfect Balance to Leap Accounting. At that time, Joyer Consulting was expanding its business into the Great Lakes area, and we were one of their first clients in this area.

Since that time, Joyer Consulting has been our IT consultant of choice. Part of the reason for this choice was Joyer's accreditation as a LEAP partner, since we rely heavily on the smooth running of our LEAP programs. Joyer provides remote monitoring of our computer systems, and recently they have opened an office in Taree, which provides a closer and more personal service and availability.

We have found the technical and administrative staff at Joyer Consulting to be most helpful, providing a significant service to us and ensuring that our systems remain operable and efficient.

We readily provide this reference for Joyer Consulting, finding them to be most capable and willing.

Yours faithfully
