The Manager
Leap Legal Software Pty Limited

Dear Sir/Madam

RE: DOUGLAS TAYLOR

Mr Taylor has provided IT support for this practice for about ten years.

Mr Taylor has excellent knowledge of computer networks and has provided sound advice in relation to network issues, suitability of equipment and maintained that equipment for this practice to a high level.

I am aware that Mr Taylor also maintains the computer networks for other legal firms in the ACT.

As a customer of your legal software and as a client of Mr Taylor, I have no hesitation in recommending him as a computer consultant to provide assistance to your own customers and I believe he would perform this role to a very high standard.

Yours faithfully

TO WHOM IT MAY CONCERN

DOUGLAS TAYLOR – NEOTECH SYSTEMS

Douglas Taylor of Neotech Systems has been retained by this firm as an IT consultant since 2002. His duties have included hardware installation, software installation including small business server, exchange server and LEAP.

In 2008 he provided assistance to the firm with the installation of LEAP and now has responsibility for the ongoing maintenance of the system. Doug's maintenance of LEAP has included the upgrade of our server and transitioning the LEAP software to the new server and the addition of new client computers as and when required.

I have always found Doug to be extremely knowledgeable and competent in my dealings with him regarding LEAP. Our transition from Perfect Balance to LEAP documents and accounting was made easy with his support.

Yours faithfully
Ken Cush and Associates
